

KEVA[®] contraptions[™]

TREBUCHET

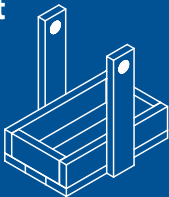

Construct, launch & bombard!

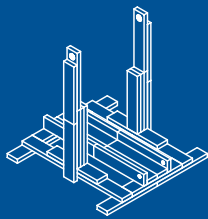

Case Pack: 6
Sku: 52131W

Using wood glue and architecturally-inspired blueprints, turn the two-dimensional plan into a three-dimensional working siege engine! Once built, test the principles of physics by adjusting the angle of the Sling Pouch and increasing the counterweight before launching the colorful KEVA balls and bombarding the target planks.

Complete Trebuchet

Everything included, no tools required!

GREAT Reviews!

"My son was so proud after building the trebuchet and the entire family spent hours building targets and knocking them down."

My son loves the trebuchet and has spent many hours playing with it. The kit was very easy to put together and has held up well.
